SUMMARY

Software Developer with expertise in Python, Flutter, and Odoo ERP development. Experienced in building scalable applications with clean architecture and intuitive user interfaces. Strong problem-solving abilities with a computer science foundation. Committed to continuous learning and delivering quality solutions that create business value.

KEY COMPETENCIES

Odoo ERP	Operating Systems	Strong interpersonal skills
Flutter	JSON-RPC Integration	Teamwork
Python	Git / GitHub	Client Interaction
REST API Integration	Linux / Ubuntu	Teaching
Frontend Web development	Microsoft Office	
Bootstrap Framework	communication skills	

PROJECTS AND EXPERIENCES

Al Jawdah Group, Riyadh

August 2026 - Present

Odoo/Python Developer

Configure and customize Odoo, develop automated workflows, troubleshoot technical issues, and support end-to-end ERP implementation and user requirements.

Tenxora company

ERP & Full Stack Developer

April 2026 - July 2026t

Airblue

Developed and enhanced accounting automation solutions by streamlining financial workflows. Implemented an Asset Management Portal to track, manage, and monitor company assets through automated processes. Successfully performed data migration through script from excel to Odoo.

BIN HASHIM PACKAGING

Customizing Sales, Purchase, Inventory, and MRP modules to align with client business workflows. Enhanced operational processes by automating order processing. Developed a customer portal for real-time order tracking, improving transparency and overall user experience.

Synchronous services company

August 2024 - March 2026

Odoo/Python Developer

Novacare Hospital

Developed and enhanced the HR module by automating employee workflows and building self-service portals for HR tasks. Created a visitor management mobile application using Flutter, featuring OCR functionality for CNIC scanning, directly integrated with Odoo for real-time sync.

Tradify

Worked on an eCommerce platform, customizing sales and purchase modules to match client workflows. Streamlined business logic and enhanced system usability for efficient product and order management.

Impetus Consulting

Complete HR Management System tailored to organizational requirements, covering employee lifecycle management, attendance, leave, and performance workflows. Customized the Helpdesk module to enhance ticket lifecycle management and automated support processes. Developed dedicated self-service portals for employees and consultants, enabling request handling, and improved operational efficiency

GreenAgriMall

Improved sales, purchase, and accounting processes by customizing core Odoo modules. Developed analytical dashboards and a dedicated customer portal to enhance visibility and control over operations.

Mahmood Group – Apparel Division

Designed and implemented a custom Letter of Credit (LC) Management system. Customized key modules like sales, inventory, accounting, and purchase. Built REST APIs to integrate Odoo with Oracle Fusion and created operational dashboards for better decision-making.

Mahmood Group – HR Division

Designed and developed a complete HR Management System in Odoo Community Edition, covering end-to-end employee lifecycle management. Built custom HR modules including Appraisal Management, Probation Tracking, Resignation Process, Succession Planning, and Employee Calibration to automate HR operations. Implemented automated recruitment workflows to streamline hiring processes and candidate management. Additionally, developed a Flutter-based mobile application integrated with Odoo HR modules, enabling real-time employee interaction, approvals, and HR self-service functionality.

Freelance Project

2024 - Present

Flutter App with Odoo Integration (License-Free Access)

Developed a cross-platform Flutter application integrated with Odoo ERP, enabling employees to access key HR features without requiring Odoo user licenses. Implemented a custom login system and secure API connection to manage attendance, leave requests, and employee data, helping businesses digitize HR workflows while minimizing licensing costs.

Student Evaluation System

Developed a student performance evaluation system by customizing Odoo's HR module. Enabled teachers to assess students through dynamic evaluation forms capturing grades, attendance, and behavior. The system automates percentage calculations, generates detailed PDF reports, and emails performance summaries to parents. Key features include digital academic records, custom evaluation criteria, and seamless parent communication — streamlining the entire assessment process and eliminating manual reporting.

Visitor Management System – Flutter & Odoo Integration

Developed a modern, cross-platform visitor management app using Flutter, integrated seamlessly with Odoo ERP. The system features real-time OCR for CNIC scanning, employee directory access, and a streamlined check-in/check-out process. Includes visual analytics for visitor trends and a custom login system that removes the need for Odoo user licenses, reducing operational costs. All visitor data is securely stored in Odoo, ensuring centralized and efficient record management.

Recruitment Offer Automation

Designed and implemented a custom recruitment automation feature in Odoo to streamline the offer letter process. The system automatically generates and sends offer letters from the Recruitment module, allowing candidates to accept or reject offers directly through the Odoo Portal. Candidates can securely access and download all related documents, reducing manual HR workload and enhancing the hiring experience with a fully digital and professional workflow.

ArfaTech

Flutter Developer Intern

July 2024 - August 2024

Currently developing and maintaining cross-platform mobile applications using Flutter and Dart. Contributed to the development of Beyond Style, a salon booking app, focusing on creating user-friendly interfaces and ensuring smooth functionality.

Currently playing a key role in the development of Ride Rush, a ride-hailing and dispatching app, focusing on enhancing user experience and optimizing dispatching processes.

Hazara University

Technical Support

Oct 2022 - Jan2024

Provided technical support to students and faculty, addressing and resolving operating system issues. Assisted users with troubleshooting, installation, and configuration of software and hardware. Gained hands-on experience in diagnosing and resolving technical problems in a timely and efficient manner.

Enhanced user satisfaction by effectively managing and resolving their technical concerns.
Explored Odoo ERP during the internship, gaining foundational knowledge in its core modules, customization, and functional workflow.
Learned to navigate Odoo’s backend, create basic customizations, and understand how ERP systems support real-world business processes.

Final Year Project - Chatting Application

Feb 2024 - June 2024

Hazara University

Developed a chatting application using Flutter for the frontend and Firebase for the backend. Implemented features including real-time messaging(one-to-one, Group), story updates, audio and video calling, and an admin panel for user management.
Ensured secure user authentication and data storage, while integrating complex backend solutions with a user-friendly mobile interface.

Practice Projects

- AI Chatbot Frontend:** Developed a user-friendly frontend for an AI chatbot, focusing on interactive design and seamless user interaction.
- Weather App:** Created an application to provide real-time weather updates using public APIs, with features for location-based forecasts.
- Quiz App:** Built an engaging quiz app with various question types and scoring systems, enhancing user experience and app functionality.
- To-Do App:** Designed and implemented a to-do list application with task management features, helping users organize and track their tasks effectively.

Teaching

- Hazara University**
 - Mobile Application Development (Programming)
- Pakistan Group of Collage**
 - Diploma Of Information Technology
